Research

University of University of Illinois 1989
Section of Cardiothoracic Surgery
Supervisor: Sidney Levitsky, MD FACS
Study of myocardial contractility in swine model

National Heart Lung & Blood Institute 1984-1986
National Institutes of Health, Bethesda MD
Clinical: Adult and congenital cardiac surgery.
Cardiac cath lab

Lawrence Schmetterer MD FACS
Curriculum vitae

NIH Animal Laboratory:
Developed swine model of neonatal pulmonary hypertension.
Performed morphometric analysis of pathologic lung.
Isolated perfused lung model study pulmonary endothelial function.
Studied effect of endothelial derived relaxing factor (EDRF)
on induced, reversible and fixed pulmonary hypertension
Correlation of pathologic changes with perturbation of vascular reactivity.
Supervisor: Richard E. Clark, MD FACS
Chief, Surgery Branch, NHLBI, NIH

Georgetown University Medical Center: 1986
Dept. of Physiology and Biophysics
Gas liquid chromatographic Isolation of EDRF
Supervisor: Peter Ramwell, Ph.D

Armed Forces Institute of Pathology, Pulmonary Pathology Branch 1986
Morphometric analyses of pulmonary hypertension in
swine model
Supervisor: Renu Virmani, M.D.

Department of Biology, Duke University, Durham N.C. 6/1978-6/1979
Gene transfer mechanisms
GLC assay for candida sepsis
Supervisor: Richard O. Burns, M.D., Ph.D

University of Southern California San Diego 5/1977-9/1977
Department of Infectious Disease
Development of gas-liquid chromatographic
assay for early diagnosis of candida sepsis
Supervisor: A.I. Braude, M.D., Ph.D.

Publication

Krukenkamp IB, Silverman NA, Arzouman D, Badellino M,
Schmetterer, LI, Levitsky S: Ventriculoarterial coupling
influences regional contractility. J Surg Res 49(2):1-5, 1990

Society Memberships

Alpha Omega Alpha Honor Medical Society
American College of Surgeons, Fellow
American Medical Association
